

WireE Transparent Ethernet Solutions (TES)

Extend your Ethernet services to provide uniform carrier grade performance to your clients, regardless of their location.

WireE Transparent Ethernet Solutions (TES) extend Ethernet services to remote and difficult-to-reach markets beyond urban areas. We combine the latest in Ethernet technology with our industry leading team of network design experts to provide carrier grade solutions backed up by a stringent service level agreement. WireE's TES solutions are designed with seamless scalability in mind, enabling you to address both current client requirements and future expansion with minimal cost implications. As a native Ethernet solution, you are positioned to offer your customers a seamless service, regardless of where they are located.

Transparent Ethernet Solution

Features of Transparent Ethernet Solutions:

- Seamless End-to-End Wholesale Service
- Native Ethernet (can carry Legacy TDM Circuits over Ethernet)
- Layer 2 Transparent LAN Service
- Focused on Fringe Urban, Rural and Remote Markets
- Compliant with Carrier Ethernet Standards
- Guaranteed Performance (up to 5-9's availability)
- Scalable Bandwidth (up to GigE)
- 24x7 managed service
- Cost Effective
- Custom Engineered Solutions Addressing Specific Client SLA Requirements (QoS, Availability, Latency, packet loss, MTTR)

**EXPERTISE IN
NEXT GENERATION
NETWORKS**

Benefits of Transparent Ethernet Solutions

Cost Effective

Extend network services to locations where it was previously cost-prohibitive to do so. Lower operating costs without compromising performance.

Improved Service Quality

Bandwidth options up to GigE, all supported by the universality, simplicity and flexibility of Carrier Ethernet.

Operated by WireIE

WireIE owns, configures, monitors, and maintains the TES network.

Improved Flexibility

Custom engineered solutions offer unlimited flexibility to meet individual customer requirements, including seamless integration with legacy technologies.

Facilitates Enterprise Applications

High bandwidth, low latency enables enterprise applications such as cloud computing, Voice over IP (VoIP) and telepresence.

Secure

Security is an essential ingredient in WireIE's Transparent Ethernet Solution. In addition to IPsec, our solutions offer customized VLAN configuration, along with AES / 3DES encryption.

Benefits of WireIE

Wholesale pricing

We offer wholesale pricing and use 'best of breed' technologies – we balance costs with functionality in recommending the right solution for your unique requirements.

Carrier Ethernet Experts

We are leaders in the Ethernet category, bringing together the most qualified partners and suppliers to deliver exceptional results.

Focused and Agile

We are dedicated to ensuring your project is delivered on time and on budget.

Engineering Depth

We have substantial, industry-leading engineering depth - our team members have engineered every generation of wireless access and backhaul technology to date.

Dedicated Project Management

Enjoy the convenience of working with a single point of contact rather than having the headache of managing multiple vendors.

Let's start the conversation.
